Hi Mike and Shawn,

Here's a draft version of our Notice amendment review comments. Today is our due date to respond. Our formal comments (to be reviewed and signed by Paul Baker) are some days out still.

The number of text comments are about half, so that's good. You'll see some comments that are partial repeats that we can explain. We're also re-including the figure comments from last time, for reference.

Thanks for the Agapito, Whetstone, and geophysical survey reports. We're still considering the current and future impacts of dissolution and subsidence, including after reclamation, and so evaluation of appropriate reclamation plan is ongoing. We'll want to talk sometime soon.

Let me know if you have immediate questions. I'll be in tomorrow until at about noon, and I am planning to be in the field on next Tuesday and Wednesday.

Peter
